

## Key Stage 1 Topic Home Learning 29.6.2020

To follow on from National Sports Week, how about trying to make sports challenge game. Here are instructions to make a target practise game, or you could design and make your own game.

See how many points you can score and think of how you can record your total. You could even challenge another person to see who can score the most points.

You will need: a cardboard box, a pencil, scissors, pens and a ball.

Step 1: Collect your materials

Step 2: Remove the flaps on the box

Take the scissors and cut all of the flaps off the box. You may need to get a family member to help you.

Step 3: Draw and cut some holes.

Using the pencil draw some squares at the edge of the box and then cut them out using the scissors. If you make them different sizes, you can add more points for the smaller holes but make sure your ball will fit through.

Step 4: Decorate your target box.

If you have some pens/pencils or paints, decorate your box. Write on the points above each hole.

Now you can find a ball and start playing.

Have fun!
